Range: **NAPWORK**
Design: **Paola Navone - Otto Studio**

Description

Modular system of upholstered sound-absorbing seats with supporting structure made of wooden material and elastic belts sized to independently absorb low frequencies and covered with sound-absorbing polyurethanes and polyester which, combined with the upholstery in sound-absorbing Snowsound Fiber fabric made of polyester fibres, allows the seat to absorb the different frequencies in the best possible way. The outer fabric cover is removable.

Meets the strength, durability and safety requirements of **EN 16139:2013+AC:2013 level 1**

Results obtained in tests according to the standards:

OPTIONAL

A+E Technology , Electromagnetic reduction

The sofa is arranged to accommodate a layer of RF-reducing fabric inside if requested.

Inner cover consisting of a layer of radio frequency reducing fabric made of technopolymer metallised with pure silver capable of reducing radio frequencies without completely obstructing signals so that smartphones and Wi-Fi networks can continue to be used. The radio-frequency reducing fabric is inserted into the seats between the frame and the upholstery, making it possible to combine the functions of acoustic reverberation reduction and radio-frequency reduction. A new patented technology designed for people's well-being.
