

SCHEDA TECNICA

Struttura: realizzata mediante tubo di acciaio trafilato ad 'anello' a sezione rettangolare 70x20 mm bianco RAL 9003, nero RAL 9005 o inox lucido. Alle estremità inferiori sono inserite i piedini in abs trasparente con alloggiato il livellatore di altezza.

Le gambe portali sono unite tra loro, da una coppia di travi realizzate con tubo trafilato a sezione rettangolare 40x25 mm, innestato nel precedente. Alle estremità delle travi sono inseriti gli elementi di aggancio alle gambe portali, realizzati mediante stampata in abs, le estensioni delle travi variano da 160 a 200 cm.

Sempre alle travi del posto di lavoro si possono unire quelle provenienti dagli elementi dattilo, o dalle soluzioni laterali "a ponte" mediante apposito sistema di aggancio realizzato in metallo.

Le canaline sottopiano sono verniciate bianco RAL 9003.

Piani melaminici: realizzati in truciolare da 40 mm di spessore rivestito da carta melaminica a bassa emissione di formaldeide CARB P2, e bordati perimetralmente con massello di abs arrotondato. I piani melaminici, sono agganciati lungo le travi mediante le bussole metalliche inserite nel sottopiano. Nei piani possono essere inseriti, previa foratura, degli accessori (optional) per il passaggio dei cavi elettrici quali il semplice tappo in abs diametro 80 mm. I raccordi in melaminco sono agganciati alle gambe-portali tramite apposite staffe di ancoraggio verniciate.

Nella versione in legno il pannello è sempre in sp 40 mm impiallacciato 2 lati.

Piani in cristallo: realizzati in cristallo temperato avente 10 mm di spessore, con il perimetro a filo lucido smussato e la superficie acidato o verniciata. I piani in cristallo sono fissati alla struttura mediante ventose.

STRUCTURE: made of a rectangular section mm 70 x 20 drawn steel tube, "ring" shaped, painted white RAL 9003, black RAL 9005 or glossy stainless steel.

Transparent ABS caps are inserted to lower ends with height regulators inside.

Legs are joined to each other by a pair of beams made of rectangular section mm 40 x 25 drawn tube.

Hooking elements at the ends of beams join the legs to beams by means of printed in ABS.

Beams extension varies from cm 160 to cm 200.

The beams of the workplace can be joined to beams coming from extension desks or lateral aggregation desks to create "bridge" compositions thanks to a metal hooking system.

Cable passages underneath are painted white RAL 9003.

MELAMINE WORKTOPS: made of chipboard thickness mm 40 coated with melamine paper with low formaldehyde emission CARB P2 with ABS edge.

Worktops are hooked along the beams by metal brackets inserted in the subtop.

It is possible to insert on worktops, after drilling, (optional) accessories for passage of electrical cables, as simple ABS caps diameter mm 80.

Melamine connections are hooked to legs using special painted fixing brackets.

In the veneer version the panel is always thickness 40 mm veneered 2 sides.

GLASS TOPS: made of tempered glass thickness mm 10, with rounded polished edge perimeter and frosted or painted underlying surface.

Glasstop are fixed to structure using suction cups.
